

Severn Unival Ltd is one of the leading valve performance companies, operating globally, to provide process plant users with services designed to ensure the optimum performance from their critical valves

The Critical Valve Performance Services Company

As a technically led organisation our focus is on the critical flow control and safety isolation valves which affect production performance or safety compliance. We offer a definitive service, configured to investigate condition and operating performance and provide a series of options and solutions for improvement.

Severn Unival is 100% client focused - As a service company, we operate on the principle of making and delivering on commitments.

The key to Severn Unival and how we differentiate from our market competitors is :

- Technology specialisation in control & choke valves and their related instruments.
- Providing System performance diagnostics and process system improvement options
- Contracting to Delivery – Severn Unival makes service commitments then contracts and performs to ensure delivery .
- Best in class quality and service levels
- We match our technical case with a definitive business case that offers commercial value.
- A genuine commitment to investment, resources and long term client support.
- Regional centres strategically located throughout the U.K.

Severn Unival is configured with 3 main operating arms.

Severn Unival Performance Service - This Group offers our customers a full capability to evaluate all aspects of valve performance – Valve Condition Assessment, Process Condition review, Control Performance assessment all provide a front end

understanding of your critical valves and how they are affecting your plant performance. Bespoke design solutions, retrofitted and upgraded active components, revised specification and maintenance strategy offer a range of solutions and options for improvement.

Populated and led by highly experience applications, design and process engineers this sophisticated team of specialists work actively to understand and contribute to your business success.

Severn Unival Production - Severn Unival is not simply an engineering consultant. We also design, manufacture and commission the physical output of our technical decisions.

Severn Unival Production is fully resourced for the precision manufacture of...

- Complete new valves of individual and bespoke design.
- Bespoke Severe Service Trim Assemblies
- Actuators

With experienced contract engineers, who understand the needs and demands of shutdown programmes, liaising constantly with our clients to deliver on commitments.

Severn Unival Regional Services - With service centred strategically placed in Aberdeen; Grangemouth; Widnes; Middlesbrough; Huddersfield and Gloucester in the U.K. and Qatar in the UAE, Severn Unival offers Valve maintenance and repair services to all major industrial markets.

- Workshop overhauls; Repairs; Commissioning & Testing
- Shutdown & Outage planning and field execution
- Inventory Management & stockholding
