

ASSEMBLY & TEST CAPABILITY

FACILITY

With an 800m² assembly area, dedicated secure test cells, hyperbaric chamber and a stringently safe test pit we are capable of pressure testing up to 42,500Psi using wide ranging test mediums including water glycol, mineral oil, methanol or nitrogen gas. Our facility can be utilised for prototype proving right through to continuous production testing.

During testing, customers, clients or third party witnesses can be well accommodated with the use of our confidential offices and conference rooms - all fully equipped with high-speed internet, webcam and display/conference equipment.

In addition, any testing conducted on site can also be remotely witnessed using a high speed internet connection. Webcams can be set up in the test cells linked to a live data feed allow you to monitor test data from the comfort of your own office or another location.

SPECIFIC FACILITY DETAILS

- ✓ 800m² Assembly Area
- ✓ Test pit
- ✓ Secure Test Cells capable of 42,000Psi
