

# MACHINING CAPABILITY

## FACILITY

SST has a wide range of capability and resource for all types of sub contract machining, finishing, fabrication and precision manufacturing.

We are fully equipped with a variety of modern machines and technology, along with experienced tool makers who are well placed to deal with low volume urgent requests or small scale batch production runs.

Our in house inspection department ensures the standard of quality is maintained to the exacting high standards you would expect, and our integrated MRP system operates a strict internal Quality Management System to ensure quality is at the forefront of our business.

Our engineering design office can help with technical drawings and provide manufacturing support with regards to existing product improvements or modifications on our CAD software.

Being part of the larger Severn Glocon Group of companies we can also assist with material sourcing, NDT examination, certification and material testing.

## SPECIFIC DETAIL

- ✓ Prototype, low volume subcontract machining
- ✓ Design Engineering and Solidworks CAD
- ✓ Material sourcing
- ✓ NDT examination, certification and material testing
- ✓ ISO9001 qualified
